

Filter jugs are slow, clumsy and produce limited quantities of water, tap mounted filters are unattractive and awkward and bottled water is expensive, cumbersome and could be up to two years old.

Kinetico Drinking Water Filters eliminate the problems associated with such quick fixes at a fraction of the cost per litre! Conveniently installed under your sink or any other accessible location, they provide the most practical attractive alternative.

Model	Cost per Litre <sup>f</sup>
MAC 7000	2p
MAC 7500	4p

<sup>f</sup> Typical cost to treat drinking water based on RRP 03.04

#### Everything you need. . .

The MACguard™ Drinking Water Filters are easy to fit and come with full instructions and everything you need to carry out the installation yourself, including the drinking water tap (you will need to drill a 15mm hole in your work surface or sink to mount the tap), hose, all push-fit connections and a self piercing tap (to tap into the mains water supply).

- MACguard™ Filter
- Quick Disconnect Filter Cartridge
- Standard Lead Free Tap (see over)
- Tubing and push-fit connections
- Self Piercing Tap

**Drinking Water Filters**

*Reinventing* **Water**

Of the vast amount of water we use in our homes every day, only an approximate 1% is used for drinking. It makes sense then that this 1% is of the highest possible quality for you and your family.

For a simple solution to treat the drinking water in your home, the Kinetico MAC 7000 and 7500 filters offer a cost-effective and stylish option.

Both models sit neatly under your sink and eliminate unwanted taste, odour, chlorine and sediment from your drinking water.

In addition, the Model 7500 will also remove heavy metals such as lead, volatile organic compounds (pesticides) and cysts including cryptosporidium.

Filter Unit Shown with Standard Tap

There's nothing quite like a glass of great tasting water. Great water makes everything else taste better including your favourite drinks and recipes. Kinetico Drinking Water Filters make it easier than ever to get quality water on tap 24 hours a day every day.

#### Available Models

Classic Chrome

#### MACguard™

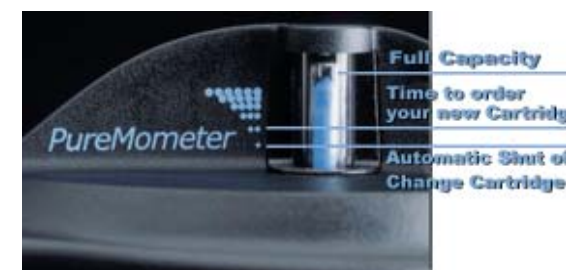

##### Maximum Protection for you and your family

Both the 7000 and 7500 Drinking Water Filters are equipped with a monitoring device called MACguard™ (MAC-Metered Automatic Cartridge). This built-in patented device is the ultimate in protection as it measures the amount of water your unit has filtered and will shut down the system when the 1850 Litre capacity has been reached (which could be up to 12 months worth of filtered water for an average household).

Without MACguard™, filters can be overused and lose their filtration ability. MACguard™ ensures you and your family will never drink a drop of unfiltered water.

#### PureMometer™

The PureMometer™ Filter Life Indicator shows you how much filter capacity remains, so you know when it's time to obtain a replacement cartridge.

#### Keeping things simple...

With all of our drinking water solutions, filter changes are a snap with our unique design. Just a quick twist makes installing a new filter cartridge as easy as can be! It really is that simple to enjoy great tasting water in your home!
